Workflow

> Research (a lot!)

> Pairing

> Mob Programming

> Standups

> Communication

Invisible Thread

Goals

> MVP – Implement Augmented Reality with a Geolocation

> Learn new programming languages (SWIFT, Objective-C, JAVA)

> Build experience with Software Development Kits

> Work with cross-platform functionality

> Revolutionize peer-to-peer navigation

Invisible Thread

Tech Stack

Demo

Successes

➤ Implementing Wikitude, setting up AR environment

➤ Diving deep into the depths of Google & StackOverflow

➤ Building a functioning App!

Obstacles

➤ Understanding mobile app development

➤ Learning to implement Software Development Kits

➤ Combining different web technologies and libraries

➤ Troubleshooting errors in newly learned languages

➤ Scheduling conflicts

Invisible Thread

Future Plans

➤ Implement user base (OAuth)

➤ Add friends from contact list

➤ Triangulate position for pinpoint accuracy

➤ Android platform...(currently in development)

➤ Deploy to App Store!

➤ Getting acquired by Facebook
